UX/UI Design Bootcamp (09/2023 - 03/2024)

Web Application Development (09/2019 - 3/2021)

Computer Systems and Networks (09/2017 - 3/2019)

LANGUAGES

Spanish – Native

English – Professional

Basque – Intermediate

Catalan – Basic

My career connects **design, technology, product, and business**. I started playing with code when I was 15, and since then my approach has stayed the same: understand the problem, create, validate, and iterate.

In recent years, I have focused on **fintech and retail** projects where precision, functional validation, and a strong understanding of both the business and the user are key.

I see myself as a true **Product Maker**, a **360 profile**. In teams that really want to move fast, you need people like this, who can adapt methodologies, simplify processes, and take ideas all the way to production.

People recognize me for **being fast, organized, and execution-focused**. I have a startup mindset, focused on iterating quickly, finding the most efficient way to work, and pushing until things happen.

I am driven by delivering real value, **raising the level of the team and the product**, and becoming very strong in the problems I am solving.

WORK EXPERIENCE

Product & Engineering - Collaborator

Coubber (Startup) – Part-time (Barcelona)

01/2026 - Present

- Product development and design in a startup focused on generating sports reports from measurement devices
- Backlog creation, product design, and code implementation
- Integration of AI models to interpret data and generate actionable insights

Senior AI Product Designer

North - Part-time (Barcelona)

10/2024 - Present

01/2026 - Present

Senior AI Product Designer

- Principal AI Product Designer in an internal AI squad: exploring and selecting tools for the team, creating internal automations to speed up other squads (prototypes, documentation, QA, research support, etc.), and part of the team designing and launching innovative AI-driven projects for large clients
- Continuing projects with major clients in the banking and retail sectors

Mid-Senior Product Designer

10/2024 - 01/2026

- Lead designer in four fintech products (web and mobile) focused on financial onboarding, contracting, and management tools across B2B, B2C, and B2B2C
- Owner of financing and eCommerce checkout for one of the main banks in Spain
- Accessibility Lead, delivering accessible handoffs for web and native apps based on market requirements
- Close collaboration with POs, PMs, developers, and business teams to validate flows and meet financial and regulatory requirements

Product Designer Lead

Lowerton (Startup) – Full-time (Remote)

03/2024 - 10/2024

- End-to-end product design from scratch
- Work on complex projects, including public tenders, where clear documentation and business alignment were critical
- Participation in public tenders and creation of technical and legal documentation using AI

UX/UI Freelance

Freelance – Self-employed

08/2023 - 06/2024

- Design of digital products and conversion-focused landing pages (marketing companies, portfolios, eCommerce)
- Improvement of user flows and user experience across different projects

Full Stack Developer & UX Designer & QA

Deusto Seidor S.A – Full-time (Vitoria)

03/2021 - 08/2023

06/2022 - 08/2023

Full Stack Developer & UX Designer & QA

- Design and development of features combining technical and product vision
- UX improvements, continuous product improvement, user research, and QA
- Led a team of five specialists to refine flows and create user-centered features

Full Stack Developer

06/2021 - 06/2022

- Participation in technical decisions and solution structuring
- Bridging development and product, contributing to decisions beyond code
- Implementation of features and understanding of business logic from a technical perspective

Full Stack Developer - Intern

03/2021 - 06/2021

- Development of technological solutions from scratch
- Participation in document digitization software using .NET, Python, Angular, and C

IT Technician - Intern

NSM Educational Center – Full-time (Vitoria)

03/2019 - 06/2019

- Redesign and development of a WordPress system to manage educational resources and improve daily efficiency
- Testing the new platform with teachers and students, collecting feedback and iterating improvements
